RADIUS CM200™/CM300™ MOBILE

VHF & UHF Models, Switchable 12.5/20/25 kHz

All CM200/CM300 Models Include:

- Standard Microphone (Compact Microphone with Transmit LED, Hang-Up Clip & 7 Ft. Coil Cord HMN3413)
- Standard Inst Bracket (Low Profile Mounting Bracket GLN7324)
- Standard Power Cable (HKN4137_R)
- User Guide / Safety Manual
- Two Year Warranty

CM200/CM300 Programmable Features:

- 12.5/20/25 kHz Switchable
- Busy Channel Lockout
- High/Low Power Settings
- Local/Distance Mode

CM200 - 4 Channel Models:

- 2 Programmable Buttons
- Single Priority Scan
- Quik Call II™ Call Alert/Selective Call (Decode)
- MDC1200 PTT ID (Numeric ID Encode)

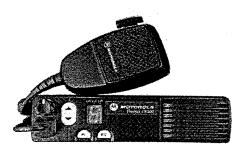

CM300 - 32 Channel Models:

- 4 Programmable Buttons
- 8 Character Alphanumeric Display
- Dual Priority Scan
- Option Board Expandability
- Two Memory Channels
- Quik Call II™ Call Alert/Selective Call (Encode/Decode)
- MDC1200 PTT ID (Numeric ID Encode/Decode)

- CM200/CM300 Mobiles are not compatible components with the GR Series Repeaters.

The following frequency is not allowed: 444.860

SUGGESTED RETAIL

MCS2000™ Mobile Series Remote Mount - Conventional Radio Systems VHF & UHF Bands

All MCS2000 models include:

- On/Off/Volume Select Rotary Switch
- FLASHport Upgradeable
- Remote Mount
- Full Size Palm Microphone
- MIL Std 810 D, E (see Catalog Sheet for applicable tests)
- Radio Service Software Programmable
- Backlit Buttons
- LDC Display
- Speaker
- 17 Ft. Control Cable
- Negative Ground Power Cable
- Mounting Hardware
- User Guide (Quick Reference Card)

Notes

- 1) Ignition Sense Cable does NOT ship standard. The B113 NO CHARGE option must be ordered.
- 2) 7.5 watt external speaker with 8 Ft. (2.44m) and a rotary dial for channel/mode selection. Antenna selection must be made when placing an order. (See ordering requirements and options page for details). MCS2000 Accessories meet varying MIL Standard Requirements. For additional information contact Product Services.
- 3) All MCS2000 radios are part of the FLASHport program and **ship standard** with a FLASH EE PROM, allowing feature upgrades within System Software Packages and upgrades between systems (contingent upon remaining within the same RF deck and memory space available in the mobile).
- 4) FCC Information: AZ492FT3781 (146-174 MHz) / (403-470 MHz)

General Ordering Information

- 1) Order the MCS2000 mobile as a main line item.
- 2) One antenna option MUST be ordered as a sub-item. (see option page)
- 3) The MCS2000 Mobile Series radios are part of the FLASHport Program. This means that MCS2000 models can be loaded with different software packages. Indicate the appropriate System Software Package (H35) as second sub-item. A System Software Package MUST be ordered for each radio unit ordered.
- 4) Frequency and squelch information are not required. Orders will be accepted without this information.
- 5) There are no restrictions as to the number of individual decode and encode PL and DPL codes that can be assigned in a radio. PL and DPL codes can be mixed on a mode. MCS2000 does not support unique PL's.
- 6) System Enhanced Options can be loaded at the time of radio purchase or at a later date through the use of software field upgrades (a FLASHport package, Smart RIB, RSS Terminal and RSS package are required for all software upgrades). The MCS2000 mobiles can be upgraded electronically in the field with new features in the current system or to new systems operation (contingent upon utilizing the same RF deck and other hardware limitations) by ordering upgrade kits from the MCS2000 FLASHport Aftermarket upgrade price page which appears later in this section.
- 7) ANTENNAS: All mobiles MUST INCLUDE AN ANTENNA Option or a NO ANTENNA REQUIRED G325 option.
- 8) Order RSS programming software package if required. (For programming of the radio in the field an IBM 486 (or compatible) computer with 5.0 DOS or higher and 8MB RAM is highly recommended.)
- 9) Names and aliases must be programmed via Radio Service Software in the field. All Stat-Alert parameters must be field programmed.
